A journal for new paths in biomedical science

Vol. 29 [Issue 2/2012]

Official organ of: ASCCT, American Society for Cellular and Computational Toxicology, Fairfax, VA, USA; CAAT, Center for Alternatives to Animal Testing, Johns Hopkins University, Baltimore, MD, USA; CAAT-Europe, University of Konstanz, Konstanz, Germany; Doerenkamp-Zbinden Chairs in Germany, India, The Netherlands, Switzerland and USA; ecopa, European consensus-platform for alternatives, Brussels, Belgium; EUSAAT, European Society for Alternatives to Animal Testing, Vienna, Austria; t4 – transatlantic think tank for toxicology, Baltimore, USA, Konstanz, Germany, Utrecht, The Netherlands

Aims and Scope – Protecting More Than Animals

ALTEX publishes original articles, short communications, reviews, as well as news and comments, meeting reports and book reviews.

ALTEX is devoted to the publication of research on the development and promotion of alternatives to animal experiments according to the 3R concept of Russell and Burch: Replace, Reduce, and Refine. Animal experiments are defined by the editors as all experimental procedures involving the use of animals in testing, research and education or to obtain tissues, organs, and other animal-derived products which may cause pain or distress to animals. Besides covering the biomedical aspects of animal experimentation, ALTEX is also devoted to the bioethics of the complex relationship between humans and animals. Articles published in ALTEX must express a basic concern for the dignity of living creatures and the recognition of animals as our partners. All articles will be judged according to stringent scientific standards.

Manuscripts submitted to ALTEX are evaluated by two reviewers. The evaluation takes into account the scientific merit of a manuscript and its contribution to animal welfare and the 3R principle.
